CANINE REMEDIAL MASSAGE AND REHABILITATION PRACTITIONER COURSE –

PRACTICAL DATES 2027

Choose your practical days to fit in with other commitments.
Please discuss any specific requirements or queries directly with your tutor.

Planning your practical days –

- Choose from the dates below to fit the practical days around your other commitments.
- You can download the pdf from the website so that you can manage your practical dates.
- Inform your tutor of the practical dates you plan to attend within 10 days of the start date to ensure the date is available. (Refer to the Your4legs Cancellations and Refunds Policy)
- Ensure any practical dates you can no longer attend are cancelled prior to 3 days before the date of the practical day to avoid the risk of incurring any additional costs. (Refer to the Your4legs Cancellations and Refunds Policy)
- Make sure you attend all the relevant practical days and lectures - see below.

NOTE – COMPULSORY LECTURES:

- There are options to attend live zoom sessions for the 3 compulsory lectures if you have to travel a long distance from within / from outside the UK.
- If attending compulsory lectures by live zoom, this will be classed as half a practical day.

Compulsory lecture subjects and tutored practical days	Number of lectures / practical days
Lecture - Therapy process including gait and static assessment Supports home study block 1 Key learnings = details of the therapy process from initial client contact and veterinary approval through to aftercare advise. Understanding the importance of gait and static assessment and learning an assessment process.	1
Lecture – Musculoskeletal, skin and nervous system Supports home study block 2 Key learnings = the anatomy and function of muscles, tendons, ligaments, fascia, bones and joints, the canine skin and nervous system and how these systems work together.	1
Lecture - Illnesses, injuries, conditions and an introduction to rehabilitation Supports home study block 3 Key learnings = common conditions, illnesses and accidents based on canine breeds, conformation and activities. Covering the veterinary diagnosis and the healing process. Introducing key exercises and tools for supporting canine rehabilitation.	1

Therapy practical days Key learnings and practice = the entire therapy process from taking case history, gait and static assessment, therapy techniques and routines, completing therapy session sheets and feedback to the client with relevant aftercare and / or rehabilitation advise. *Where a lecture does not take up an entire day, the rest of the day will be used as therapy practice*	9
Physiotherapeutic tools practical day (Available as an optional CPD day.) Key learnings = What are physiotherapeutic tools, how do they work and their effects on animal tissue. Looking at a range of physiotherapeutic tools in detail, including how they are applied, with live examples where available.	Available as optional CPD
Total number of practical days including compulsory lectures	**12**
